Incoming BioPartnering Missions for 2014

The New Brunswick Bioscience team is continuing to accept applications to participate in a biopartnering incoming mission. This initiative targets bioindustry/bioscience business and research organizations who wish to invite and host international business and/or research collaborators to New Brunswick, any time between now and December 2014.

The steering committee will be selecting the missions based on the criteria below, giving priority to those who expressed interest this spring and have identified an incoming partner. **We are now seeking additional companies and research organizations interested in participating.**

Each mission will support travel and local accommodations up to the following amounts:

- Travel: up to \$1,675
- Accommodation: up to \$400

The participation fee for each Biopartnering Mission is \$400, to be paid by the host New Brunswick company or institution to BioNB before travel and accommodations are booked.

The visit must take place before December 31, 2014.

A Biopartnering Mission Survey must be completed and submitted by the host company (NB company inviting the guest) within two weeks of completing the mission.

To apply, please provide BioNB with the following information by **July 25, 2014**:

- Contact information (name, job title, address, email, phone number) for the incoming partner.
- Business description, what business are they in and what market do they serve?
- What is your rationale for extending the invitation? How does this meeting benefit you and your business development in New Brunswick's bioscience sector?
- What outcomes do you expect from the meeting (for example, New Markets or Sales, Attracting Investment, Research Collaboration, Technology Transfer)?

If you are interested, please [contact](#) Jenn O'Donnell or Meaghan Seagrave for more information.
